## How to use

The cities of origin and destination have been listed alphabetically. The flights against each destination city have been listed on the basis of their time of departure.

The flight details are given in the following order - days of operation, time of departure, time of arrival, number of stops and flight number.

In case of more than one flight going to one particular city, the flights are listed according to the time of departure.

### **Example**

*To locate a flight from Delhi to Mumbai, first find Delhi and then locate Mumbai below it which is positioned alphabetically.*

*To choose your flight, go to column one for the days of flight and then to column two for the departure time.*

*In subsequent columns you will find the arrival time with the number of stations in between. The last column mentions the airline and the flight number.*
